

# WYOMING CITY SCHOOLS COVID-19 DASHBOARD

Updated:  
August 3, 2022

This dashboard is updated by 5 p.m. each Wednesday and is intended to keep our entire school district community informed of COVID-19 in our buildings.

Per the Ohio Department of Health, only cases among students or staff engaged in on-site instruction, activities, or support services during the infectious period are included. Regardless of the student or staff member's primary mode of instruction/work, an individual is classified as "on-site" if there was any interaction with other students or staff during the individual's infectious period. The infectious period is defined as the time from 48 hours before the onset of symptoms (or 48 hours before sample collection of a positive test for asymptomatic individuals) until the time when the individual is isolated.

## New on-site cases:

*Reporting Period:*

*Monday-Sunday of previous week*

**Student case(s):** 0

**Staff case(s):** 0

**Buildings:**

---

## Cumulative on-site cases:

*Reporting Period:*

*Total on-site cases since August 3, 2022*

**Student case(s):** 0

**Staff case(s):** 0
